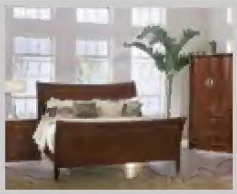
AllerAir Industries

The 4000 Exec Air Cleaner

An all-purpose air purifier ideal for the home and office. Compact and economical.



AllerAir air purifiers feature a high efficiency filtration system which removes chemicals, gases, odors and particles leaving you with clean and healthy air.

Carbon filter

- 10 lbs of granular activated Mac-B carbon

HEPA filter

- HEPA is warm rolled to prevent cracking at folds
- Laser tested to ensure integrity
- Traps 99.97% of particles as small as 0.3 microns

Pre-filter

- Easy to vacuum-clean or change
- Pre-filter prevents large particles from clogging the HEPA and carbon filters

Robust all-metal housing

- baked-enamel housing ensures that no harmful vapors are released.
- 18 gauge steel.
- 4 casters for easy maneuverability.
- Cylindric shape maximizes airflow.
- 3 speed fan effective for up to 1200 square feet

Options

- 10 or 20 Watt UV lamp available.

Use the AllerAir 4000 Exec to fight the growing problems of asthma and allergies

Shipping Weight: 30 lbs.

The 4000 EXEC
10 lbs. of activated carbon, combined with true HEPA

HEPA Filter Traps Particles Like:
- Pollen
- Dust
- Dust mites
- Pet dander

Adsorb Chemicals, Gasses and Odors Including:
- Mold toxins
- Paint fumes
- Cleaners
- Solvents
- Furniture glue
- Carpets
- Plastics
- Insulation materials
- Printer emissions
- Cigarette smoke

Invest in your health with the AllerAir 4000 Exec air purifier.

More About the Compact and Economical 4000 Exec

Our Mac-B carbon filter absorbs harmful gasses and odors before you do!

The EPA ranks poor indoor air quality among the top risks to public health.

Though our bodies have some defense against airborne particles, we have no protection from airborne chemicals.

Activated carbon is the same material used in military gas masks.

Children, the elderly and those with compromised immune systems are especially susceptible to the effects of poor indoor air.

Indoor air may be 2 to 5 times, even 100 times more polluted than outdoor air.

AllerAir purifiers are used in hospitals, dental clinics and operating rooms.

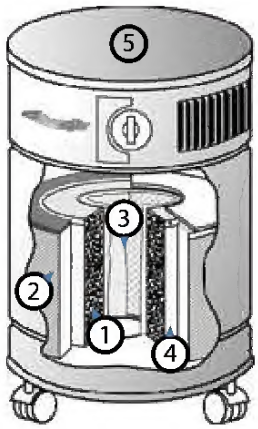
How our filtration system works:

12 lbs. Mac-B™ carbon filter bed ①

- Our activated carbon can trap up to 60% of its own weight in gasses and odors.

HEPA filter ②

- Our HEPA filter traps airborne particles such as dust mites, pollen, mold and animal dander.
- Our HEPA filter traps 99.97% of particles as small as 0.3 microns.



Cleanable pre-filter ③

- This pre-filter stops larger particles from clogging the HEPA and carbon filters

Anti-microbial filters ④

- Two anti-microbial filter to suppress microorganisms

Metal housing with baked enamel finish ⑤

- Metal housing prevents off-gassing

Cylindrical shape maximizes air flow

- Air flows through the filters and is then circulated out through the top of the unit.

Effective for up to 1200 square feet

- Motor runs at any one of 3 chosen speeds to allow rapid room cleaning or quiet overnight use.

*** More Filtration. * More Features * Better Value. It's the AllerAir Guarantee!**
